"Bug"

Visit "[Bug](#)" on MotoLyrics.com

There's a bug in my brain
And it's drivin' me insane.
There's a bug in my mind
Of an alien kind.
All the right is all wrong
And the wrong is all right.
Gotta act, get 'em back,
Am I losing my track?
The last will be first
And the first will be last

I've got a bug in my mind of an implant kind,
I've got a bug in my mind of an implant kind,
I'll be the bug up your arse,
I'll be the bug up your arse,
I'll be the bug up your arse,
I'll be the bug up your arse!

Believe it!

Remove it!

You can't see it...

Before I die, open my eye,
Let me see the world and all it's wonder.
Let me see clear, a life without fear,
Realizing the oneness of all life.

Believe it!

You can't see it...

Alien communication,
Alien communication.
Neural transmission,
Triggered by electronic, magnetic impulse waves.

Intrusion, infusion, confusion, delusion,
Who can I talk to to get a solution?
I've got a bug in my mind of an implant kind,

An electronic device and I'm payin' the price.
I've gotta fight back, I'm under attack!
I've got a bug in my mind that's been drivin' me wild,
I've got a bug in my mind of an implant kind,
I'll be the bug up your arse,
I'll be the bug up your arse,
I'll be the bug up your arse,
I'll be the bug up your arse!

Believe it!

Remove it!

You can't see it...

Before I die, open my eye,
Let me see the world and all it's wonder.
Let me see clear, a life without fear,
Realizing the oneness of all life.

Not very nice, DNA splice, doing not what they should.
It would be good, if they all could, just leave us alone.

It would be good, if they all would, just leave us alone.

Believe it!

Remove it!
