He can see off into the future  
He knows what's going on  
So when he says there's a place there for her  
You know, he can't be wrong

Now when she comes, she comes in full effect  
No regrets and everything she wants she gets

She's going out with God  
She ain't gonna let me forget  
She's going out with God

Look at all of the people round here  
He put them where they are  
He's the one they all love and they fear  
A real superstar

Now when she comes, she comes in full effect  
No regrets and everything she wants she gets

She's going out with God  
She ain't gonna let me forget  
She's going out with God

He's got his fingers in everything  
He built the world from dust  
And he can pull all of your puppet strings  
He's got your faith and trust

Now when she comes, she comes in full effect  
No regrets and everything she wants she gets

She's going out with God  
She ain't gonna let me forget  
She's going out with God

Oh, yeah, she's going out with God
