Finally I see what's right in front of me, the chance to
be free
From all the troubles that this life could bring if only we
would sing...
I've been living for tomorrow so long I can't recall the
feeling I had when I was with you

Living every single day as if it's my last day.
I missed the reason why I'm here.
Everything is meaningless except a life that is
confident in you.
That you would walk beside me in all the things I see
and in all I do.
It's because of you.

No more living for tomorrow.
Today's the day that I will be the one to change the
world.
Living every single day as if it's my last day.
I know the reason I am here.

Finally I see what's right in front of me, the chance to
be free
From all the troubles that this life could bring if only we
could sing...
No more living for tomorrow.
Today's the day that I will be the one to change the
world.

Living every single day as if it's my last day.
I know the reason I am here.
No more living for tomorrow.
Today's the day that I will be the one to change the
world.

Living every single day as if it's my last day.
I know the reason for today. I'm living for today.
