Change is coming 'round the bend
So why don't we pretend
Everything is gonna be the same forever?
She said "Maybe it's now or never"
There's fire in our hearts
So why don't we start dreaming again?
I said "What have we got to lose?"

Say what's on your mind
Anything you gotta say, you better say it now
Don't be scared now
Can't be scared now

We could be anywhere at all
Sweet fragrance bring me back to fall
Hey, do you really care at all?
This fight is now
So drop your gloves and wipe your brow
It's going on
Hey, do you really care at all?

She said "Right now things are perfect
I don't deserve this
I can't see this lasting long
I'm so far gone"
So before you go, I gotta know
You can look at yourself
You can look in the mirror and see what I see

Say what's on your mind
Anything you gotta say, you better say it now
Don't be scared now
Can't be scared now

We could be anywhere at all
Sweet fragrance bring me back to fall
Hey, do you really care at all?
This fight is now
So drop your gloves and wipe your brow
It's going on

And you're so far gone

And are we so far gone?
We could be anything
You could be anything
So let's be everything we are

We could be anywhere at all
Sweet fragrance bring me back to fall
Do you really care at all?
This fight is now
So drop your gloves and wipe your brow
It's going on
(Do you really care) Do you really care at all?

We could be anywhere at all
Sweet fragrance bring me back to fall
(We could be anything)
Hey, (You could be anything) do you really care at all?
This fight is now
So drop your gloves and wipe your brow
It's going on

We could be anything
So let's be everything we are

We could be anywhere at all
Sweet fragrance bring me back to fall
Hey, do you really care at all?
This fight is now
So drop your gloves and wipe your brow
It's going on
Hey, do you really care at all
[fades out]
