Just dropped in, I was driving past
You know I missed you since I saw you last
It gets lonely since you haven't been around
Little things don't make me cry
But still I think you could have told me why
You had to move out to the other side of town

Ah you caught me out
Ah you caught me out
But when I saw you walking out the door
You know I just couldn't take any more
I started crying

Every night I lie awake
Afraid what shape my dreams might take
I call your name out but I never hear a sound
You could say there's no love lost
But now I sit down and I count the cost
I wasn't ready to surrender what I found

Ah you caught me out

Ah you caught me out
But when I saw you walking out the door
You know I just couldn't take any more
I started crying

It doesn't seem there's any way
To say the things I wanna say
It's too late for me to explain I love you

Ah you caught me out
Ah you caught me out
But when I saw you walking out the door
You know I just couldn't take any more
I started crying

Ah you caught me out
I started crying
