There's no doubt in my heart
That we've been here before
Your the sweat on my back
And the lock on your door

And the circle's complete
And my lips find their home
I'm returning to you
Like the wind kisses stone

Your love is a light up ahead
So deep that we can't understand
My love crosses centuries of sand
And it's straight into you
We arranging it new

[Chorus]

I'm a time traveller when I look into your eyes
I'm a time traveller and the fire never dies
The fire never dies

[Verse]

And I'll never be lost
'Cause I know that my roads lead to you
And our stars have been crossed
Since the light of creation was new

Your love is a light up ahead
So deep that we can't understand
My love crosses centuries of sand
And it's straight into you
We arranging it new

[Chorus]

I'm a time traveller when I look into your eyes
I'm a time traveller and the fire never dies
Time is a healer
Time is a stealer
Time is an angel
Time is a devil that flies

[Solo]

Time is a healer
Time is a stealer
Time is an angel
Time is a devil that flies

I'm a time traveller when I look into your eyes
I'm a time traveller and the fire never dies
I'm a time traveller when I look into your eyes
I'm a time traveller and the fire never dies
I'm a time traveller (oh)
I'm a time traveller (oh-oh, yeah)
I'm a time traveller (oh)
I'm a time traveller (traveller)
I'm a time traveller
I'm a time traveller
I'm a time traveller (oh-oh, yeah)
I'm a time traveller
