Blasted past the cops blasted off the earth I found a
new sky I found a new birth break away from here kill
all of my fears break away from here kill all of my fears
why did you cry the pain is shared deep inside the pain
is over between us I say I found a new sky I found a
new birth yes this will hurt the pain's in both my eyes I
tell you now don't look back with no regrets and yes
this will hurt the pain's in both my eyes I say and I want
to see and I want to be (free) you won't believe the pain
in both my eyes I scream lie asleep hearts break heart
quake
