This must be my lucky day, baby's back again
He said he'd never go away, baby's back again
Throw my troubles to the wind, happiness come right
on in
'Cause baby's back again.

Eyes there will never be another teardrop
Lips he's waiting just a kiss away
The future looks so bright and everything's alright
Since my baby's home again to stay.

This must be my lucky day, baby's back again
He said he'd never go away, baby's back again
Throw my troubles to the wind, happiness come right
on in
'Cause baby's back again.

--- Instrumental ---

I never saw the moon shine more brightly
All the stars came out tonight for me
He said he still loves me, that's all I need to know
'Cause that's the way real love has to be.

This must be my lucky day, baby's back again
He said he'd never go away, baby's back again
Throw my troubles to the wind, happiness come right
on in
'Cause baby's back again.

'Cause baby's back again...
