Stand beside me, stand beside me
You're the only one who ever made me care.

I can't stand to think that I might be alone
Not alone again not the way it was back then
Before you walked into my heart and told me we would
never part
So stand beside me don't ever let me be alone again.

Stand beside me, stand beside me
For if I should lose you I just couldn't get anywhere
Stand beside me stand beside me
You're the only one who ever made me care.

There'll be times when everything goes wrong
But darling I won't care if I know you're standing there
No matter what we have to do together we can see it
through
So stand beside me and I'll be standing right there next
to you.

Stand beside me, stand beside me
For if I should lose you I just couldn't get anywhere
Stand beside me stand beside me
You're the only one who ever made me care...
