When I lost your love dear I lost my everything  
The sunshine from my life has disappeared  
The night we said our last goodbye I wished you  
happiness  
Then I walked away so darkness would hide my tears.

Without the face of the loved one this world's a  
lonesome place  
True love is mighty cheap at any cost  
I'm doin' to be a failure though the future brings wealth  
and fame  
For the only one I ever loved I lost.

--- Instrumental ---

If I find fame and fortune what good would get to me  
I couldn't fool my heart it knows me best  
There's one love in every lifetime mine belongs to you  
And that means more to me than all the rest.

Without the face of the loved one this world's a  
lonesome place  
True love is mighty cheap at any cost  
I'm doin' to be a failure though the future brings wealth  
and fame  
For the only one I ever loved I lost...
