I know you know it's no secret the way I feel
I won't let go, there's something in your touch
I thought I'd never find something in your kiss
Brought me back to life

This woman's heart beats steady and strong
And keeps holding on, I'll give my all to stand by your
side
For the rest of my life it's true only for you
From this moment on I give you this woman's heart

Don't be afraid you can count on a love that's real
Each step we take I'll be by your side
And we'll build our world together, put your faith in me
I promise that forever

This woman's heart beats steady and strong
And keeps holding on, I'll give my all to stand by your
side
For the rest of my life it's true only for you
From this moment on I give you this woman's heart

This woman's heart beats steady and strong
And keeps holding on, I'll give my all to stand by your
side
For the rest of my life it's true only for you
From this moment on I give you this woman's heart
