Come aboard my ship  
I've something to show you  
Some new equipment  
To take us where we're going  
A subspace machine  
A hole in the fabric  
Of the very being of the universe  
Ignition, atomic power on  
We must break our orbit  
And soar right past the planets  
It took man a million years  
To make it only this far  
And we'll leave the solar system  
Very soon  
Around the universe in eighty days  
Sit down I think you'll like it  
Out in space  
There's nothing left to stop us now  
We're sure to win the race  
In our warp  
When time and space are one  
We can no longer see the sun  
In fact there's nothing there for us to see  
For light is nowhere near as fast as we  
Our computer says  
We've exceeded expectations  
When we reach our departure point  
There will be celebrations  
What this means is our existence  
No longer has a limit  
The universe will be our new home  
Now the Earth is just beginning  
To learn of our existence  
All life in space must  
Learn to live as one  
Maybe now is the time  
For friendship with our neighbors  
For our planet is  
The second from the sun  
Around the universe in eighty days  
Sit down I think you'll like it  
Out in space

There's nothing left to stop us now  
We're sure to win the race  
Sure to win the race
