"The Same Space"

Visit "[The Same Space](#)" on MotoLyrics.com

Some sort of assembly took us through time
Awakened my mind
I was as clockwork, you were alive
To prevent my eyes from surprise

When we wish for the same things many see signs
Some others find
When we're together we come alive
When we organize

Collective arrival
We share the same space
We feel the same impact
On arrival and embrace

Some joining connection larger than life
Carried our minds
You were in contact
I was alive when your eyes united with mine

When we rise through the stages
Many still minds grow as we find
We are connected weaving our lives
Now we're boundless

We share the same space
We share the same space
We share the embrace
