Build A Fire - Lenny D remix

=====

[Bill]

driven all the day

and most of the night

from Galloway hills

to the city lights

just fall of the road

and not much respect

pulled off the gas

when the needle touched red

sitting here

i watch the flames

they climb higher

and they take me again

but sometimes

i remember when

the memories

you can't trust them

[chorus]

buid a fire

buid a fire

buid a fire

buid a fire

[Bill]

pulled up to rest

let the engine cool a while

open the beans

gather wood to the fire

I hum this tune

to all the girls I've known

should i care

about the chances i've blown

[each line first Maxine, then Bill]

don't forget

there's less to life

than blowing your mind

and to crash that car

(and) don't forget

we're dying today

i'm a hero

with nothing await (?)

[chorus:]

build a fire

they're gonna build a fire

build a fire

they're gonna build a fire

gonna build a fire

they're gonna build a fire

gonna build a fire

they're gonna build a fire

they're gonna build a fire

they're gonna build a fire

build a fire - they

they're gonna build a fire

they're gonna build a fire

they're gonna build a fire

[Bill]

when daylight breaks

I'll be down that road

Rockman 'an me

with a lighter load

we'll stop for a lunch

in some taco bar

Lee Marvin on the jukebox

Wanderin Star

[each line first Maxine, then Bill]

sitting here

i watch the flames

they climb higher

and they take me again

but sometimes

i remember when
the memories
you can't trust them
but don't forget
there's less to life
than blowing your mind
and to crash that car
(and) don't forget
we're dying today
i'm a hero
with nothing await (?)

[chorus:]

build a fire
they're gonna build a fire
they're gonna build a fire
they're gonna build a fire
