That's fine with me
Don't think I care
Do waht you want
As yo see fit
That's quite alright
It's all okay
Just be yourself
That's fine with me

For a second you might wonder if it's real

If that's alright
Just say okay
If that felt okay
Let's do it again

For a moment you might question what you see
For a second your whole world will disappear

This is mind control and you know it
This will shut you up and you know it

What's wrong with you
R. U. OK?
Are you still here
Don't slip away
Just breathe in deep
And stay awake
Don't close your eyes
Don't close your eyes

For a moment you might question what you see
For a second your whole world will disappear

This is mind control and you know it
This will shut you up and you know it

This is mind control
