What you hide and conceal
Open up and enable
Put your cards on the table

Conquer and define
Your life is all mine
Roll up and black out
No time to hesitate and doubt

Take what you've being given
Make your stand
'Cause the life that you're living
May soon come to an end

Do what you can, what you want
What you must
Feel the hunger inside
Hold on to your trust

Confess and purge
Experience every urge
Approach and achieve
Strengthen your belief

Admit and defend your emotions
'Cause they send out the message
That it's you and that's the only
Thing that's true

Do what you can, what you want
What you must
Feel the hunger inside
Hold on to your trust

Do what you can, what you want
What you must
Feel the hunger inside
Don't lose your trust

Safe and secure
Never be to sure

Show and tell
Until you go to hell

Love and hate
You're destined by fate
Play and work
Enjoy your time on this earth

Do what you can, what you want
What you must
Feel the hunger inside
Hold on to your trust

Only death is eternal
Make no mistake
What it all comes down to
Night shall overtake

Do what you can, what you want
What you must
Feel the hunger inside
Hold on to your trust

Do what you can, what you want
What you must
Feel the hunger inside
Don't lose your trust

Do what you can
You're a beautiful child
Do what you want
From a beautiful land

Do what you can
You left a curse on me
Do what you want
Could you overpower me?

Do what you you can
Just one way
Do what you want
One last kiss

Do what you must
Give me the bullets
Don't lose you trust
