Inter-planetary frequency
Alteration of destiny
Inter-planetary frequency
Surrendering to my ultimate destiny

The spaceship will come to take us away
Out of the orbit and into the light
We're gonna be picked up and sent on a flight
Get ready to join us, escape the destruction

Enjoy the abduction, enjoy the abduction
Surrender, enjoy the abduction
Surrender, enjoy the abduction, Supernova

I will always praise my maker
I will always return to my taker
I will never be a faker
I will never be a forsaker

I will always praise my maker
I will always return to my taker
I will never be a faker
I will never be a forsaker

They are visiting us for their genetic testing
I don't think it's such a blessing
But then again how can I know?
I must not judge so much
You know

The message I got is simple and easy
When we get on the spaceship we must not flip
We have to be fearless, it helps to keep smiling
Are you ready to join us avoid the disaster?

And be with the master, and be with the master
Surrender and be with the master
Surrender and be with the master
Bend over

I will always praise my maker
I will always return to my taker

I will never be a faker
I will never be a forsaker

I will always praise my maker
I will always return to my taker
I will never be a faker
I will never be a forsaker

Immortality
Mortality
Ich bin unsterblich
Sterblich
I'm a witness

A UFO factory with millions of robots around
One of the entities drew blood from their finger into a
syringe
Was it against my will? It wasn't surreal
Hey you, you annoyed, where do you come from?
Do you have a maker?

The spaceship will come to take us away
Out of the orbit and into the light
Surrender, surrender
We're gonna be picked up and sent on a flight
Get ready to join us, escape the destruction
Enjoy the abduction, enjoy the abduction
Supernova

I think they need us
I think we don't need them
I think they need us
And I think we don't need them

Don't try to rationalize it
Just analyze it, advertise it
Be fearless
