It's not my idea
But I can see your fear
Better off while you're still worth a damn
Is your conscious clear
Bear in mind my dear
Stay in line it's all they ever say

And you've done nothing wrong
So far so good till it's gone
And you've done nothing wrong
So far so good till it's gone and it's

No

So raise your fist real high
It's time for us to rise
No more background lying, infernal watching
So make your voices heard
It's time we took control
No more pissing around our days

So piss off pretty pity boy
Ain't self loathing a bitch
So piss off pretty pity boy
Ain't self loathing a bitch and it's

No

The exit signs mark our escape
A true conclusion another chance to make
We won't go home tonight
