Secrecy surveillance, corruption's in the air,
They're watching us secretly, but no one seems to
care,
We cannot trust the doctors, equipped with all their
lies.
Bribed by the drug industries to sell us infiltrated lies.

Fight x4
Fight for a future
I for one will not stand for this
Politicians are all greedy filthy fascists,
It's a one-way system, and were not on the list,
If you do not believe, then they already own your mind,
Were fighting for a future, but were running out of
time.

Fight x4
Fight for a future
I for one will not stand for this
