Times have changed and it's so hard to just get by  
Now Uncle Sam wants... Uncle Sam wants you to die  
I sit and ask myself, 'will anyone hear my voice?'  
And now I tell myself, 'it's all my fucking choice'

I'd rather be a nobody than be like you  
Quality over quantity Â– It's what you should do  
No one understands the issues that we all face  
And now they're calling this one a national disgrace

Terrorism strikes home and we cannot deal with it  
Natural disasters occur... the President is a racist  
We're in a state of fear no one else can understand  
We're high on red alert, but we will not lose again

I'd rather be a nobody than be like you  
Quality over quantity Â– It's what you should do  
No one understands the issues that we all face  
And now they're calling this one a national disgrace

Why can't anybody see  
This is not democracy  
Donate money to the funds  
What happened to opinion  
They say freedom and liberty  
They're guilty of conspiracy  
I guess the message wasn't sent  
Blame it all on the government

I'd rather be a nobody than be like you  
Quality over quantity Â– It's what you should do  
No one understands the issues that we all face  
And now they're calling this one a national disgrace
