Everybodys wondering  
where did the blues come from?  
I said everybody's wondering  
where did the blues come from?  
way back in the low land  
right of from my country farm .

When you're in trouble,  
blues is a girl's best friend.  
When you're in trouble,  
blues is a girl's best friend.  
Blues is on the way you're going (?)  
and the blues don't care where you've been.

We just can't let the blues die,  
blues don't mean no harm.  
People, we can't let the blues die  
Blues don't mean no harm  
Im gonna move back in the low land  
that's where the blues come from.

We just can't let the blues die  
Blues don't mean no harm  
We just can't let the blues die  
Blues don't mean no harm  
Im gonna move back in the low land  
that's where the blues and I come from.
