Yeah, Kool Keith
Black Sil and company
(Yeah yeah)
As we party, two, zero, zero, zero

Step in coat, check vocal supreme sound perfect
You wack man, haven't you heard this?
Matador king ladies swarm around me like Jon B
As I stop rappers tryin' to copy Alpo, Rich Port and AZ

My temperatures one thousand three
Look at these big head kids on labels tryin' to MC with a
globe dome
I told you to tell that man to stay home
Tell Russell to call me with Sylvia Rhome

Gave him the gas, now he gotta pump in his ass
I don't care if you go out with Stacey Dash
Rentin' cars, you tryin' to copy Nas
Sound like A.G., you ain't my man from Cold Crush Kay
Gee

Don't try to play me
You never made a record with Mo Bee and Master P
I saw you on the Greyhound bus station floor
Layin' down with a doo rag on like a circus clown

Strippers keep dancin' around, I'm Bronx bound
Your fans catch migraines from me doin' my thang

We sweet unique Pete
Look at these ladies massagin' our feet
We sweet unique Pete
Look at these ladies massagin' our feet

We sweet unique Pete
Look at these ladies massagin' our feet
We sweet unique Pete
Look at these ladies massagin' our feet

Yeah
Yo showdown, sho' shot, double-K, flow pop

Navigate, interactive flashback
Now who nice wit it? Spit it on the block daily
Product, never shady, slang the real

Send it to backstage, flame created a rage
Mays bump that in my mezzanine controller
High-roller, program, this shit jam
To quick access, asses on my lap crouches

Dip through, y'all need a piece of this mental
Plus a sip of this dick in your mouth
Either that or stop sleepin', peepin' the next man's style
I elaborate on fraudulent and stick to the wild

Phone-tap, we order Ocean Spray with that
Fuji film, honey, spread that
Finger the ass crack in fact I'ma bounce with that
Fuckin' dancers back to back
Aww, yeah

We're sweet unique Pete
Ladies massagin' our feet
We're sweet unique Pete
Ladies massagin' our feet

We're sweet unique Pete
Ladies massagin' our feet
We're sweet unique Pete
Ladies massagin' our feet
