She had force religious
Some seed forced the hell
God took our insurance
For wind that angel fell

Understanding be jumpy, dog on a stairs
Those hate love's brothers did then I hit some pairs
Now love sits beside him twostep up out of case
Three step world looks pretty
Oh shock cause delays
But when, game was over, he got no privacy
And some place to wag them, and look chop doggie's
bee

There's just further they'll be there too long
Their Shadows grow, they can't believe, the poor
How the night have got so strong.

Forces ...Darling
I'll never run from you
Forces ...Darling
I'll never run from you

But then things were different a long time ago
Self off hell 's borders saint Peter just want go
She knew office dark side as was there no light
He said : "Honey, I am definitive ...would be right"

There's just further they'll be there too long
Their Shadows grow, they can't believe, the poor
How the night have got so strong

Forces ...Darling
I'll never run from you
Forces ...Darling
I'll never run from you
