The clouds close throwing their rays  
over the sea of blood  
The stars dissappear and in ther places  
mountains of ice appear  
I only see the light of your eyes  
What was made, was destroyed  
The world became slow and dumb  
when you woke up, it was over

Scream, scream  
Scream loud, loud  
Believe me, man  
Scream, scream  
Scream loud, loud  
Nobody will hear you

The darkness stays intact  
insensitive to your plea  
you one your future to progress  
That the human mind invented  
you don't have power to scream  
when your mind is dead and gone  
you're another vctim of progress  
What happened? You're sick

Scream, scream  
Scream loud, loud  
Nobody will hear you

You remember the paradise you lived in  
you can't resist no more  
you are the mercy of disaster  
When you close your eyes  
Just a question I wanna ask you  
Are those behind this in the same shit as you?  
Die in peace!  
Die in peace!
