this is all I have
and I give it to you and now I'm relieved
you believe lies
you will not believe my truth
you make life livable and movie-like
go get high
and I'll shove it away down inside
know the reason so that I wanna hide

you've been wrong and I plan to make it right
I'll take the fall
just so you can sleep at night
you make life livable and movie-like
friends will lie
but I'll shove it away down inside
know the reason so I don't wanna hide

Well I'm so pain inspired
may my lyrics grant me penance
for a rumor
that I tried
to load a pretty shell and put a bullet in your head
I never cared for blood but I love the color red
I made you cum so hard

(repeat)

That I load another shell and put a bullet in your head
I never cared for blood but I love the color red
I made you cum so hard
