Indication of the essence
Concentrating on mass submission
Crying, race, philosophy
Sacramental confidence
Discovered desire

Hesitant, intelligence
Impersonate integrity
Aging trauma from the past
Depending on naivety
Personified tyranny

Seeds of distorted thoughts
Planted into the brains of us all

Burn the brain

In this cold world, we go on
Our generation won't support
This system anymore

In this cold world, we go on
Our generation won't support
This system anymore

Panic spreads among the victims
Driven to absurd copulation
Magnetism leaves them passive
Skeptical towards awareness
Serial misfortune

Seeds of distorted thoughts
Planted into the brains of us all
