SOLO - FRANK

Dehumanization through industrialization

Bring fear to the masses of reincarnation

Manic frustration deterioration

Nature fights back for its own preservation

Concrete coffin breeds lunacy

Cold steel skeleton

Desperation in the factory

Crank out oblivion

Material world paranoia

Corporations rule the earth

Material world paranoia

Enslavery begins at birth

Power's illusion brings global confusion

A forgone conclusion of mind's evolution

Nature's destruction through massive production

A blatant example of mindless construction

Concrete coffin breeds lunacy

Cold steel skeleton

Desperation in the factory

Crank out oblivion

Material world paranoia

Don't dream about how life can be

Experience your dreams

Before this prefab culture wastes your life

Stay on the straight and narrow course

Material wealth is yours

But the promise of a better future is a lie

SOLO - MILLE

The promise of a better future is nothing but a lie
