What is wrong with you now
You look like you havent slept for days
that something is really pulling you down
and youre moving away
that is telling me that you dont feel so strong
But you act like there is nothing going on
So youre fine
You settle down and everybodys settling down
So theres no need to cry
If youre fine, tell me now
Is life now letting you down
Woehoe
So life is sweet
Woehoe
Is it everything you dream

Why dont you tell me whats on your mind
I see that you cried last night
its So confusing
I know it must be so hard
Fall down and Breaks your heart
its like youre loosing
everything you love and all of your dreams
now tell me whats for real

got everything that you want
but do you get what you need in life
its the only thing that matters you see
cause everytime that I look at you
youll see that Im scared of you
that nothing that I say is true
there just might
but watch it now
before you will come Stumbling down
no you can be nice
were out of time
tell me now
is life now letting you down
woehoe
so life is sweet
woehoe
is it everything you dream

Why dont you tell me whats on your mind
I see that you cried last night
its So confusing
I know it must be so hard
Fall down and break your heart
its like youre loosing
dont you tell me whats on your mind
I see that you cried last night
its so confusing
I know it must be so hard
Fall down and break your heart
its like youre loosing
everything you love and all of your dreams
now tell me whats for real

dont you tell me whats on your mind
I see that you cried last night
its so confusing
I know it must be so hard
Fall down and break your heart
its like youre loosing
everything you love and all of your dreams
now tell me whats for real
for real
for real
whats for real
for real
for real
