He talked about big events
Said he'd someday be there
He will fly above us
And your tongue made me special
Everybody would see
And he's always been big
He tried to manage above
Tried to be a good guy
Studied hard to be smart
Never cry 'bout us hard
He would get there by this
'cause he would make it
All around the world he'd get there now
He would some day be rich
He would get out of this shit
He would make it
All around the world he'd get there now
All said he had got there, he would get there by now (?
)
He was probably there
You might think he was lying
Now you could see

He had always been there
He tried to manage above
Tried to be a good guy
Studied hard to be smart
Never cried 'bout us hard
He would get there by this
'cause he would make it
All around the world he'd get there now
He could some day be rich
He would get out of this shit
He would make it
All around the world he'd get there now
He would make it
All around the world he'd get there now
And someday be rich
He would get out of this shit
He would make it
All around the world he'd get there now
He'd get there now
He'd get there now
He'd get there now
