[Chante]
Baby I'm calling to let you know not to worry
Cause there's nothing wrong
Just need to get away by myself
So I'ma take the long way home
Nothing can come between us
Please understand I need room to breathe
So I'ma take a little time for me

[Chorus- Chante]
It's not like I don't wanna be around you
But every now and then I need a little bit of time to
Figure It Out
It's not as bad as it seems (but I'll be alright)
Just need a moment for me

[Kenny]
Gotta know I don't mean what I say
When I say something mean
It's just one of those days (I gotta figure it out)
It's not as bad as it seems
Just need a moment for me
Baby I know loneliness (can get a little cold)
But screamin, fussin and fightin (can get a little old)
So I gotta take some time to myself
Instead of putting the blame on you (you would never
see a man)

[Chante]
So please, hope you're not upset with me
Just gotta get over this thing
I'ma be good and I'm gettin it
I'ma get it right my baby, baby, baby

[Chorus- Chante]
It's not like I don't wanna be around you
But every now and then I need a little bit of time to
Figure It Out
It's not as bad as it seems (but I'll be alright)
Just need a moment for me

[Kenny]
You gotta know I don't mean what I say
When I say something mean
It's just one of those days (I gotta figure it out)
It's not as bad as it seems
Just need a moment for me

[Chante]
It's not like you don't treat me right
It's not like you don't have the time
Just gotta get away to clear my mind, my mind
[Kenny]
It's not that I don't wanna see you
And I know you'll be right there when I need you
Baby I just need some time to clear my mind, my mind
[Chorus- Chante]
It's not like I don't wanna be around you
But every now and then I need a little bit of time to
Figure It Out
It's not as bad as it seems (but I'll be alright)
I need a moment for me
[Kenny]
You gotta know I don't mean what I say
When I say something mean
It's just one of those days (I gotta figure it out)
It's not as bad as it seems (it's alright)
Just need a moment for me (just a moment)
