Kristofferson

This could be our last goodnight together

We may never pass this way again

Just let me enjoy 'till its over

Or forever

Please don't tell me how the story ends

See the way our shadows come together

Softer than your fingers on my skin

Someday this may be all

That we'll remember

Of each other

Please don't tell me how the story ends

Never's just the echo of forever

Lonesome as the love that might have been

Just let me go on loving and believing

'Till it's over

Please don't tell me how the story ends

Please don't tell me how the story ends...
