On tele, police are murdered, demonstrators are just  
killed  
Why two different words for the blood that's spilled?  
In this struggle, you decide who's right  
But are condemned 'till the end of time, that man will  
fight  
Condemned for all time are the super master race  
They'll fight over religion or the colour of your face  
When's the next Hitler? When's the next war?  
When's the next time they'll exterminate the poor?  
Who are "they", who are "us"?  
Is 90% of the human brain full of hateful pus?
