An ominous, scorching maelstrom surges  
To feed and blow the dry storm  
Multiple lightning strikes viciously hitting the ground  
Tornadic winds at great speeds ignite the fire front

Hot gas rises up to the clouds  
Sucking the air from the entire plane  
Scorching surface, devastated soil  
Fornication under smoked skies

Decimation comes with hot winds  
Through flowing streams of untamed flames  
Tongues of fire swirling and dancing  
Incineration under burning skies

Combustion infernal

Combustion infernal, everything burns, everything  
melts  
Heat of thousand suns burns the ground to the core

[Repeat 1st Verse]

Crown fires burning up higher at the top of houses and  
hills  
Trees and corpses reduced to dust, fornication under  
burning skies
