Delta flight 1539 departing 9:15 taking me to northern  
skies a place i've  
Never seen circle 'round and touch the ground twenty  
steps to greet me i  
Guess things are different here out in the country here  
you come a flash of  
Blue our eyes diverting neither knowing what to do it's  
disconcerting and  
Driving home you held my hand as you debriefed me  
thought i'd found my  
Promise land out in the country sleeping in the garden  
house candle-lit and  
Cozy sharing thoughts and gifts we bought all the  
world seemed rosey eager  
I embraced your pleas as you catechized me we don't  
eat me we don't eat  
Cheese out in the country love was fresh like  
vegetables everything seemed  
Healthy life was rich and made me feel prosperous and  
wealthy bergamot and  
Arnica how the smell can send me lying there beside  
the fire out in the  
Country deep breathing, sun shining, moonlight  
caressing the ground caught  
In a deep freeze and oh how it moved me take me from  
the city lights on a  
Shiny amtrak train riding up the riverside bring me  
home to you again brew  
Me up some twinings tea tell me that you love me hold  
me safe inside your  
Arms out in the country i don't know how it disappeared  
manifesting treason  
Fell apart like leaves from trees with the change of  
season and for the  
Heartache and the scars i have my memories of  
making love under the stars  
Out in the country. . .out in the country  
(Emily Saliers/guitar)
