are you slipping away?  
this is hard for me to say  
I'm barely holding on  
so scared of the unknown

I'm still here  
holding your hand

close your eyes  
- I'll stay beside you  
I'm still here  
- I won't let them find you  
I'll be lying right here by your side  
and even though my heart is breaking  
seeing you like this I'll face it  
don't be afraid  
- you're not alone

from now I'll walk alone  
no one to guide me  
- I'm completely alone  
was it worth all this pain?  
for just a stolen moment in the rain

I'm still here  
holding your hand

close your eyes  
- I'll stay beside you  
I'm still here  
- I won't let them find you  
I'll be lying right here by your side  
and even though my heart is breaking  
seeing you like this I'll face it  
don't be afraid  
- you're not alone

how can I  
- move on and fly  
when I still don't know  
- the reason why

you and I  
- we touch the sky  
someone give me  
- the reason why

close your eyes  
- I'll stay beside you  
I'm still here  
- I won't let them find you  
I'll be lying right here by your side  
and even though my heart is breaking  
seeing you like this I'll face it  
don't be afraid  
- you're not alone

close your eyes  
- I'll stay beside you  
I'm still here  
- I won't let them find you  
I'll be lying right here by your side  
and even though my heart is breaking  
seeing you like this I'll face it  
don't be afraid  
- you're not alone
