The baby's so simian  
I guess we never evolved completely  
You can see it in me

A naked grass widowed moment  
Did you see his beautiful eyes  
In the red twilight

We've done our time  
In the pressure cooker  
On Arnica Montana  
With the desperate  
Tearing down the highway  
Like they've got no place to stay

A fulgent fourth grader  
Dressed in nylon and blue  
A sheepish smile just for you

We've done our time  
In the pressure cooker  
On Arnica Montana

With the desperate  
Tearing down the highway  
Like they've got no place to stay

We laid our caps  
And fingernails  
And leaves behind the back porch  
Through the smoke  
For shining eyes  
The future's later  
Everybody's here
