So where are you at, Kristine?
You blush as you look at me
I smile 'cause I want to make sure
That you truly understand

I'm right where I've always been
Our love is where it's meant to be
Inside and our hearts are going to prove
That the future is our friend

When you hold me that goes to show me
It's a true love story and I know

'Cause that's how it goes
(That's how it goes from here we are a magical)
Magical, love
(That's how it goes for you and me)

That's how it goes
(That's how it goes from here, we're an original)
Original, my love
(That's how our love was meant to be)
That's how this love was meant to be

Now baby, we can't look back
Our love shouldn't go that way
Tomorrow is the only thing we need
And it's all that I can see

Now lover, we're right on track
Getting stronger everyday
I know that you're running
Out of reasons for insecurities

Come on and hold me, love how you show me
Time will write our stories and baby, I know

'Cause that's how it goes
(That's how it goes from here we are a magical)
Magical, my love
(That's how it goes for you and me)

That's how it goes
(That's how it goes from here we're an original)
[Incomprehensible], my love
(That's how our love was meant to be)
That's how this love was meant to be

This is it, this is us, love is where we are
Down to faith, it's down to trust
Follow your heart right into these arms

Love how you show me
Time is gonna write our stories
Baby, I know

That's how it goes from here
(That's how it goes from here we are a magical)
Magical, love
(That's how it goes for you and me)

That's how it goes
(That's how it goes from here, we're an original)
Original, love
(That's how our love was meant to be)

Come on, why don't you test?

I don't ever want you to die, babe
I don't ever wanna have to live without you for a day
Baby, only gotta look me in the eye
Gonna be the universal end before I say goodbye

I don't ever want you to die, babe
I don't ever wanna have to live without you for a day
Baby, only gotta look me in the eye
Gonna be the universal end before I say goodbye

I don't ever want you to die, babe
I don't ever wanna have to live without you for a day
Baby, only gotta look me in the eye
Gonna be the universal end before I say goodbye

Come on, now
Come on, now
