tonight, tonight. I've been waiting, all this time I've been waiting, for the time to be with you, and the time has come to be. I'll be with you tonight, I'll be with you tonight. while you were gone you gave me kisses of light, and on your return, I'll see your face shining bright, for as the dawn, it will be here over night. I'll be with you tonight, I'll be with you tonight. think on the goodness, keep your heart full of gladness, for our souls are just waiting, for our time to unite. I'll be with you tonight, I'll be with you tonight. while your were gone, you gave me kisses of light, and on your return, I'll see your face shining bright, for as the dawn, it will be here over night. I'll be with you tonight, I'll be with you tonight. while you were gone, you gave me kisses of light, and on your return, I'll see your face shining bright, for as the dawn, it will be here over night. I'll be with you tonight, I'll be with you tonight, I'll be with you tonight, I'll be with you tonight.
