Why do we have to fight, why can't we spend our time
trying, i want to be close to you, keep love from
slipping through my hands

word said in anger aimed at someone
are hard to take back once the damage is done..

lets stop now

CHORUS:

as long as we're here alive on this earth, i going to love
you for all that it's worth, and one of these days we're
going to take off and fly
lets make the most of our time
as long as we're here

some people live there lives holding there fears
inside..them, afraid to build windows to let the light of
the world.. in, they hide in the darkness of self imposed
walls, if theyed tear them down they'd have it all

CHORUS

when your with me i breath easy you are my need right
now love me

as long as we're here i going to love you and one of
these days we're going to take off fly

CHORUS
