Dark was the night  
Tears on my face  
We gathered in the candlelight  
As the whole world stood still

How can I forget that prayer for the dead  
Underneath that blackened sky  
As close as we could get

It's the age we're livin' in  
A dark sign of the times  
Can't let the madness  
Kick us down to the ground

We'll rise, we'll rise  
We'll shine in the night  
We'll rise, we'll shine  
From the ashes of eternity

We'll rise, we'll rise  
We'll shine in the night  
We'll rise, we'll shine to eternity

Another starry sky  
Another silver moon  
And soon the sun will shine  
Warming our roofs

Gather your children  
We must move with the wind  
To make a fire bright  
From the flames within

We'll rise, we'll rise  
Like an eagle flies in the sky  
'Cos together we're strong  
And we'll rise, we'll rise
