I know you well
I'm always around
I've seen your life
before the day you were born
I know your heart, and I read your mind
your life's an open book
there's nothing to hide

bought with a price
nothing you've done
it's a gift to you
My love is unconditional

Chorus:
I know everything about you
I know what you say and do
but I still love you
I know everything about you
I know what you're thinking through
but I still love you

you wake up each day
asking yourself
will He forgive
one more time if i fail
each time you fall, look to the sky, it won't
change My love for you
it won't change My mind

lift your head up
you will always be Mine
My grace for you
will last until the end of time

Repeat chorus

I know everything about you
I know what you're thinking through
but I still love you everything you say,
you do, you are, you want, you think, you feel
