How can i smile while vampires sing?
I must confess that sometimes i live up in a tree.
Blessed by a ghost with an open arm and a steady
hand for redemption.
I forget that winter comes with a Deadline, and then
she's gone.
Cold air cage opened up. resurrected: Dark angels.
And the conversation gets placed once again,
underneath my brain and up in front of my mouth.
Technology, Well, she takes a walk and she is so
proud.
The catalysts include a microphone and a highway of
wires. Misused and taken for granted.
How i can i smile while vampires sing?
Blessed by a ghost with an open arm and a steady
hand for redemption
