All the wonderful things that you are
Don't you know you're a natural star
How you had me baby right from the start
Let's get out of this place and go go go go go

I found out about love
Man was I living lean
She came down from above
She came with everything

Warm up the car
Go get your guitar
Let's go explore

All the wonderful things that you are
Do you know you're a natural star
How you had me baby right from the start
Let's get out of this place and go go go go go

All the wonderful things we can see
Daydreaming in the seat next to me
How I hang on every word that you say
Let's get out of this place and go go go go go

I'm tripping on the ceiling
There's angels in the girl
A sexual healing
The finest high in the world
I tip my hat to where you're at
And how you got my back

All the wonderful things that you are
And you know mamma that you're a star
How you had me baby right from the start
Let's get out of this place and go go go

All the wonderful things we can see
Daydreaming in the seat next to me
Shall we stop for a spot of some tea
Let's get out of this place and go go go go go
