Leave us, I'm in Heaven and I can't believe I'm  
watching you  
When everything you float upon comes down too soon  
Jesus hairdo, I mean we all live in America  
And if everything you say is true, it's bad TV

And you shine like a star  
And you shine like a genius

Fix our hands together, when I surf another wave  
comes right  
Don't wanna cry, know what I need, oh, choose your  
words  
Jesus Hairdo, I mean we all live in America  
It's hard to know reality when you don't have a life

And you shine like a star  
And you shine like a genius

Sing your song whenever  
Can't you see you're catchin' something I need  
Get yourself together  
Now you're coming, coming out of the base

And you shine like a star  
And you shine like a star  
And you shine like a star  
And you shine like a genius
