Clouds rolling on moving shadows  
Over the countryside  
A ray of light descends from the heavens  
Your presence fills the sky

I can't deny what I'm seeing is true  
When all I can think of and all I can dream of is  
You

You're the love I have always known  
And It's You  
I will never be alone

You're all I desire You're all that I choose  
I guess that explains why I feel like I do  
I cannot deny what I'm falling into  
When all I can think of and all I can dream of is  
You  
The earth declares your glory  
There's nowhere it can hide  
And still you let me in  
You draw me to your side

You are my hope and I know that it's true  
When all I can think of and all I can dream of is

You

You're the love I have always known  
And It's You  
I will never be alone

You're all I desire You're all that I choose  
I guess that explains why I feel like I do  
I cannot deny what I'm falling into  
When all I can think of and all I can dream of is  
You
