"Could It Be You"

Visit "[Could It Be You](#)" on MotoLyrics.com

For such a long time there was nobody
I had only myself to please
I never needed anyone at all
then you came it felt like a breeze
A breeze of sunshine an the breath of life
Suddenly I knew I was wrong
my heart beats faster what a nice surprise
Oh I'll be holding on

Bridge:

It's like I knew you before it's like a star
It happend just all night I can not wait anymore
I feel so naturally right

Chorus:

Could it be you baby, I was searching for
Could it be you baby, who makes me search no more
And could it be you baby, that I was looking for
Could it be you, could it be true, could it be you

Could this be love now, between you and me
do I care, I do possibly
and all that matters is you'll be there for me
feed my dream of eternity
I wanna know you like I know myself
make me feel like nobody else
you give me freedom make me act so strong
I'll be holding on

It's like I knew you before it's like a star
It happend just all night I can not wait anymore
I feel so naturally right

Could this be love now, between you and me
do I care, I do possibly
and all that matters is you'll be there for me
feed my dream of eternity
I wanna know you like I know myself
make me feel like nobody else
you give me freedom make me act so strong
I'll be holding on

Am I dreaming or is this reality
Having you right next to me
What is the meaning of this feeling I feel
Could it mean that this love is real
I was lost on a lonely road
Praying for the peace for some god
You're like an angel on a way of life
There you were in front of my eyes

Bridge:

It's like I knew you before it's like a star
It happend just all night I can not wait anymore
I feel so naturally right

Chorus:

Could this be love now, between you and me
do I care, I do possibly
and all that matters is you'll be there for me
feed my dream of eternity
I wanna know you like I know myself
make me feel like nobody else
you give me freedom make me act so strong
I'll be holding on
