"Run"

I'll lead you to the morning
Not blinded by a light
Don't try to follow strangers
Who're running through the night

Talking birds are whispering
I think they are afraid
This peace has been deceiving

Come on let's run run run run run
It's another sunlight with you
It's another moonlight
But we can't run run run run run

You and me together
It seems we went too far
Into forbidden gardens
Not knowing where we are

We went from coast to coast
Traveled every road
Searching for the gate
This brings us to our world

But you are here with me
And we are fools miles and miles away

And we are fools...
