"The Hurt I'd Go Through"

Visit "[The Hurt I'd Go Through](#)" on MotoLyrics.com

A moment in time
Belonged to our chemistry
In a world so far away from here
Created by dreams

[refrain]
You made my earth move
Brought sunshine through your smile
Tell me what am I to do
You never warned me 'bout
All the hurt I'd go through
For you

Listen, can you still
Hear the love we made
Softly, gently
To the music we played
As you showed me the way

[Repeat Refrain]

And now I'm all alone
Abandoned by the only dream
I'd never ever really known
Hoo hoo I'm slowly breaking down

Our world, our home
Burned by reality
Warmth turned stone cold
As darkness appears
And life's taken from me

[Repeat Refrain]
