Hey kid, you know I'd love to stay and catch up  
You caught me on a bad day but  
You'll see me when your eyes are shut as you're risin'  
up  
O.K. and what I really need to say  
One day we're gonna meet again and it'll be the same  
Cause even when I'm gone you'll hear me in my song  
say

Chorus:

Every life first the sun then the night falls  
We're all on borrowed time  
I'll never say goodbye  
Take your time live your life like it's last call  
Don't wana see you cry  
We'll never say goodbye

Back when life was easy and innocent  
In a simple world ignorant  
Stealing cigarettes  
Going to get high drinking some rye  
Then again, we're all the same thing in the end  
Butterflies lose their wings and ascend  
So do friends memories resurrect a new life for the  
dead  
So and time that you wanna see me  
Raise a glass, reminisce take it easy  
Just close your eyes I'll be right there with your soul  
inside  
And there's no goodbyes  
I wish I had a handkerchief so I could wipe those eyes  
I saw my moms at the funeral she spoke so nice  
Like " what a great kid"  
Don't believe those lies

Chorus:

Every life first the sun then the night falls  
We're all on borrowed time  
I'll never say goodbye  
Take your time live your life like it's last call  
Don't wana see you cry  
We'll never say goodbye

Don't ever say goodbye, Don't ever say goodbye, never  
say goodbye, don't say goodbye, See never say  
goodbyes, because you don't have to, it ain't over  
So kid, don't mourn take your life back  
Carpe Diem and all that  
Really matters today is today see  
The more you live the happier I'll be  
Ya'd better take your time and shine  
Everybody gotta learn sometimes  
That there's no goodbyes cause after every night fall a  
new sun will rise (will Rise)

Chorus:

Every life first the sun then the night falls (night falls)  
We're all on borrowed time(time)  
I'll never say goodbye ( never say goodbye)  
Take your time live your life like it's last call (last call)  
Don't wana see you cry  
We'll never say goodbye  
( x 2)
