One day you came along and spoke so tenderly  
You kissed me oh so sweet and gave your love to me  
One moment in my life I clung to every thrill  
Time was a precious thing the day the world stood still  
For one day in my life you brought me happiness  
You stopped the lonely world with all your tenderness  
I can't get over you I guess I never will  
Time was a precious thing the day the world stood still  
The day the world stood still and you were only mine  
I held you close to me and stopped the hands of time  
I can't get over you I guess I never will  
Time was a precious thing the day the world stood still  
Time was a precious thing the day the world stood still
